How to develop guidelines - Part 2

Online Course

Primary Care

Education & Training

June 12, 2025

**This second part of a guideline development course teaches participants how to formulate clinical questions using PICO, assess evidence using GRADE domains, and apply the Evidence-to-Decision framework.**

### KEY POINTS

- The course covers identifying when a new guideline or statement is warranted and formulating focused clinical questions using PICO
- Participants learn to translate clinical questions into comprehensive search strategies and apply GRADE domains to assess evidence certainty
- The course guides learners through the Evidence-to-Decision framework and clarifies the difference between good practice statements and formal guideline recommendations
- The target audience includes healthcare professionals interested in developing guidelines as well as patients and stakeholders interested in understanding the guideline development process
