Summary

Polypectomy

Bjorn Rembacken

Polypectomy | Online Course

Digestive Oncology | Endoscopy

October 1, 2017

This educational course on colonic polypectomy aims to promote safe and effective practice through standardised protocols covering technique, patient communication, indications, contraindications, and complications.

KEY POINTS

- Polypectomy is the most commonly performed therapeutic intervention and all colonoscopists should be able to perform it safely and effectively
- The course covers communication and consent, indications and contraindications for colonic polypectomy, elements of polypectomy and polyp retrieval, and awareness of complications
- Practice has evolved considerably in recent years with a range of equipment and techniques now available for different clinical settings
- The target audience includes gastroenterologists, other physicians, surgeons, and nursing staff involved in endoscopy
