

Autoimmune Pancreatitis

Georg Beyer

Autoimmune Pancreatitis

Online Course

Pancreas

February 1, 2019

An online course covers the definition, epidemiology, clinical presentation, diagnosis, pathophysiology, and treatment of autoimmune pancreatitis, a rare steroid-responsive condition that can mimic pancreatic cancer.

KEY POINTS

- Autoimmune pancreatitis is a rare autoinflammatory condition of the pancreas that is steroid responsive.
- Correct diagnosis is key because autoimmune pancreatitis can mimic pancreatic cancer, which is ten times more common.
- The course covers clinical subtypes, diagnosis, pathophysiological considerations, and treatment strategies for autoimmune pancreatitis.
- The course is taught by Julia Mayerle and Georg Beyer and was reviewed and updated in April 2024.
- The course is suitable for gastroenterologists in training, physicians and surgeons in other disciplines, nurses, biotechnicians, and advanced-years medical students interested in gastroenterology.
