

Primary Sclerosing Cholangitis

Johannes R Hov

Primary Sclerosing Cholangitis

Online Course

January 11, 2023

This online course covers Primary Sclerosing Cholangitis, a chronic progressive liver disease characterized by bile duct inflammation and fibrosis with unclear aetiology and no effective medical therapy.

KEY POINTS

- PSC is characterized by inflammation and fibrosis of the bile ducts, leading to multifocal bile duct strictures.
- The aetiology of PSC remains unclear, though it is frequently associated with inflammatory bowel disease.
- PSC carries an increased risk for various cancers and currently has no effective medical therapy.
- The course includes PPT slides, video presentations, figures, schemes, and further readings with approximately 50 minutes of material and an estimated 60 minutes to complete including assessment.
- The course is suitable for gastroenterologists in training, physicians, surgeons, nurses, biotechnicians, and medical students.
