

Diverticular Disease

Oded Zmora

Diverticular Disease

Online Course

Endoscopy

March 21, 2024

This educational course provides a comprehensive overview of diverticular disease, covering epidemiology, clinical presentation, diagnosis, pathophysiology, and treatment options with emphasis on managing complicated diverticulitis.

KEY POINTS

- Diverticular disease is a common and complex gastrointestinal condition, particularly in Western societies, that places a significant burden on healthcare systems
- While many with diverticulosis are asymptomatic, progression to diverticulitis, diverticular bleeding, or Segmental Colitis Associated with Diverticulosis (SCAD) can lead to serious health issues requiring effective management
- The course is presented by Kassem Sharif, Adi Lahat, and Oded Zmora and includes 50 minutes of video lectures and PowerPoint presentations
- The estimated completion time is 60 minutes including a final assessment, making this course suitable for clinicians seeking structured education on diverticular disease management
