Gastric polyps

Online Course

Digestive Oncology

March 1, 2018

An online educational course covers the diagnosis, endoscopic features, malignant potential, and management of gastric polyps, which are rare incidental findings that sometimes require resection.

KEY POINTS

- Gastric polyps are frequently found incidentally during upper gastrointestinal endoscopy, are rare, and generally produce few symptoms, though some have malignant potential and need resection
- The course addresses various types of gastric polyps including their endoscopic appearance, diagnosis, pathology, malignant potential, and treatment
- Learning objectives include becoming familiar with typical endoscopic features, gaining knowledge of necessary diagnostic work-up, and learning surveillance or treatment needs for different polyp types
- The course is suitable for gastroenterologists in training, physicians and surgeons in other disciplines, nurses, bio-technicians, and advanced medical students with an interest in gastroenterology
