

The diagnosis and management of coeliac disease and gluten-related disorders

Stefania Chetcuti Zammit

The diagnosis and management of coeliac disease and gluten-related disorders

Online Course

Small Intestine & Nutrition

July 29, 2022

An online course on coeliac disease and gluten-related disorders covers pathophysiology, diagnosis including serology negative villous atrophy, treatment options, and complications of refractory disease.

KEY POINTS

- The course discusses epidemiology, symptoms, endoscopic features, and extraintestinal manifestations of coeliac disease.
- A diagnostic algorithm is presented and the general diagnostic approach to serology negative villous atrophy is described.
- Treatment options are summarized and awareness is raised of complications in patients with refractory coeliac disease.
- The course includes PPT slides and video presentations filmed in June 2022, with an estimated completion time of 60 minutes including assessment.
- Target audience includes gastroenterologists in training, doctors with special interest in coeliac disease, nurses, dietitians, medical students, and other healthcare professionals managing these patients.
