

Functional dyspepsia: Diagnosis and treatment

Tim Vanuytsel

Functional dyspepsia: Diagnosis and treatment

Online Course

Neurogastroenterology & Motility

September 1, 2020

This is an online educational course on functional dyspepsia covering diagnosis using Rome IV criteria, pathophysiology, and evidence-based management approaches for the condition and its syndromes including postprandial distress and epigastric pain syndrome.

KEY POINTS

- The course teaches diagnosis of functional dyspepsia using Rome IV criteria and recognition of cardinal and associated symptoms
- Content covers the pathophysiology of functional dyspepsia, mechanisms of action of different drugs, and evidence-based therapy choices
- The course includes postprandial distress syndrome and epigastric pain syndrome as recognized syndromes within functional dyspepsia
- Combined material duration is approximately 40 minutes with an estimated 60 minutes needed to complete the course including final assessment
- The course is suitable for gastroenterologists in training as well as physicians, surgeons, nurses, dietitians and medical students with an interest in gastroenterology
