Summary

EASL Clinical Practice Guidelines on TIPS

Standards and Guidelines

Hepatobiliary

April 2, 2025

EASL guidelines comprehensively address all aspects of transjugular intrahepatic portosystemic shunt (TIPS) placement in patients with cirrhosis, reflecting recent advances in technical approaches, prognostic modelling, and expanding indications.

KEY POINTS

- TIPS placement is a well-established procedure for managing complications of portal hypertension.
- The field of TIPS has seen rapid advances in recent years, particularly in technical approaches and prognostic modelling.
- The range of indications for TIPS is expanding.
- These guidelines focus on TIPS in cirrhosis patients; use of TIPS in surgical settings and vascular liver disorders is covered in separate dedicated clinical practice guidelines.
